

Midterm Review

PLT-4115

Q1. Consider the context-free grammar:

$S \rightarrow SS+ \mid SS^* \mid a$, and the string $aa + a^*$

1. Give a leftmost derivation for the string.
2. Give a rightmost derivation for the string.
3. Give a parse tree for the string.
4. Is the grammar ambiguous or unambiguous? Justify your answer.

Answers:

1. $S \xRightarrow{lm} SS^* \Rightarrow SS+S^* \Rightarrow aS+S^* \Rightarrow aa+S^* \Rightarrow aa+a^*$
2. $S \xRightarrow{rm} SS^* \Rightarrow Sa^* \Rightarrow SS+a^* \Rightarrow Sa+a^* \Rightarrow aa+a^*$
- 3.

4. Unambiguous

Q2. Design grammars for the following languages:

1. The set of all strings of 0s and 1s that are palindromes; that is, the string reads the same backward as forward.
2. The set of all strings of 0s and 1s with an equal number of 0s and 1s.

Answers:

1. $S \rightarrow 0S0 \mid 1S1 \mid 0 \mid 1 \mid \varepsilon$

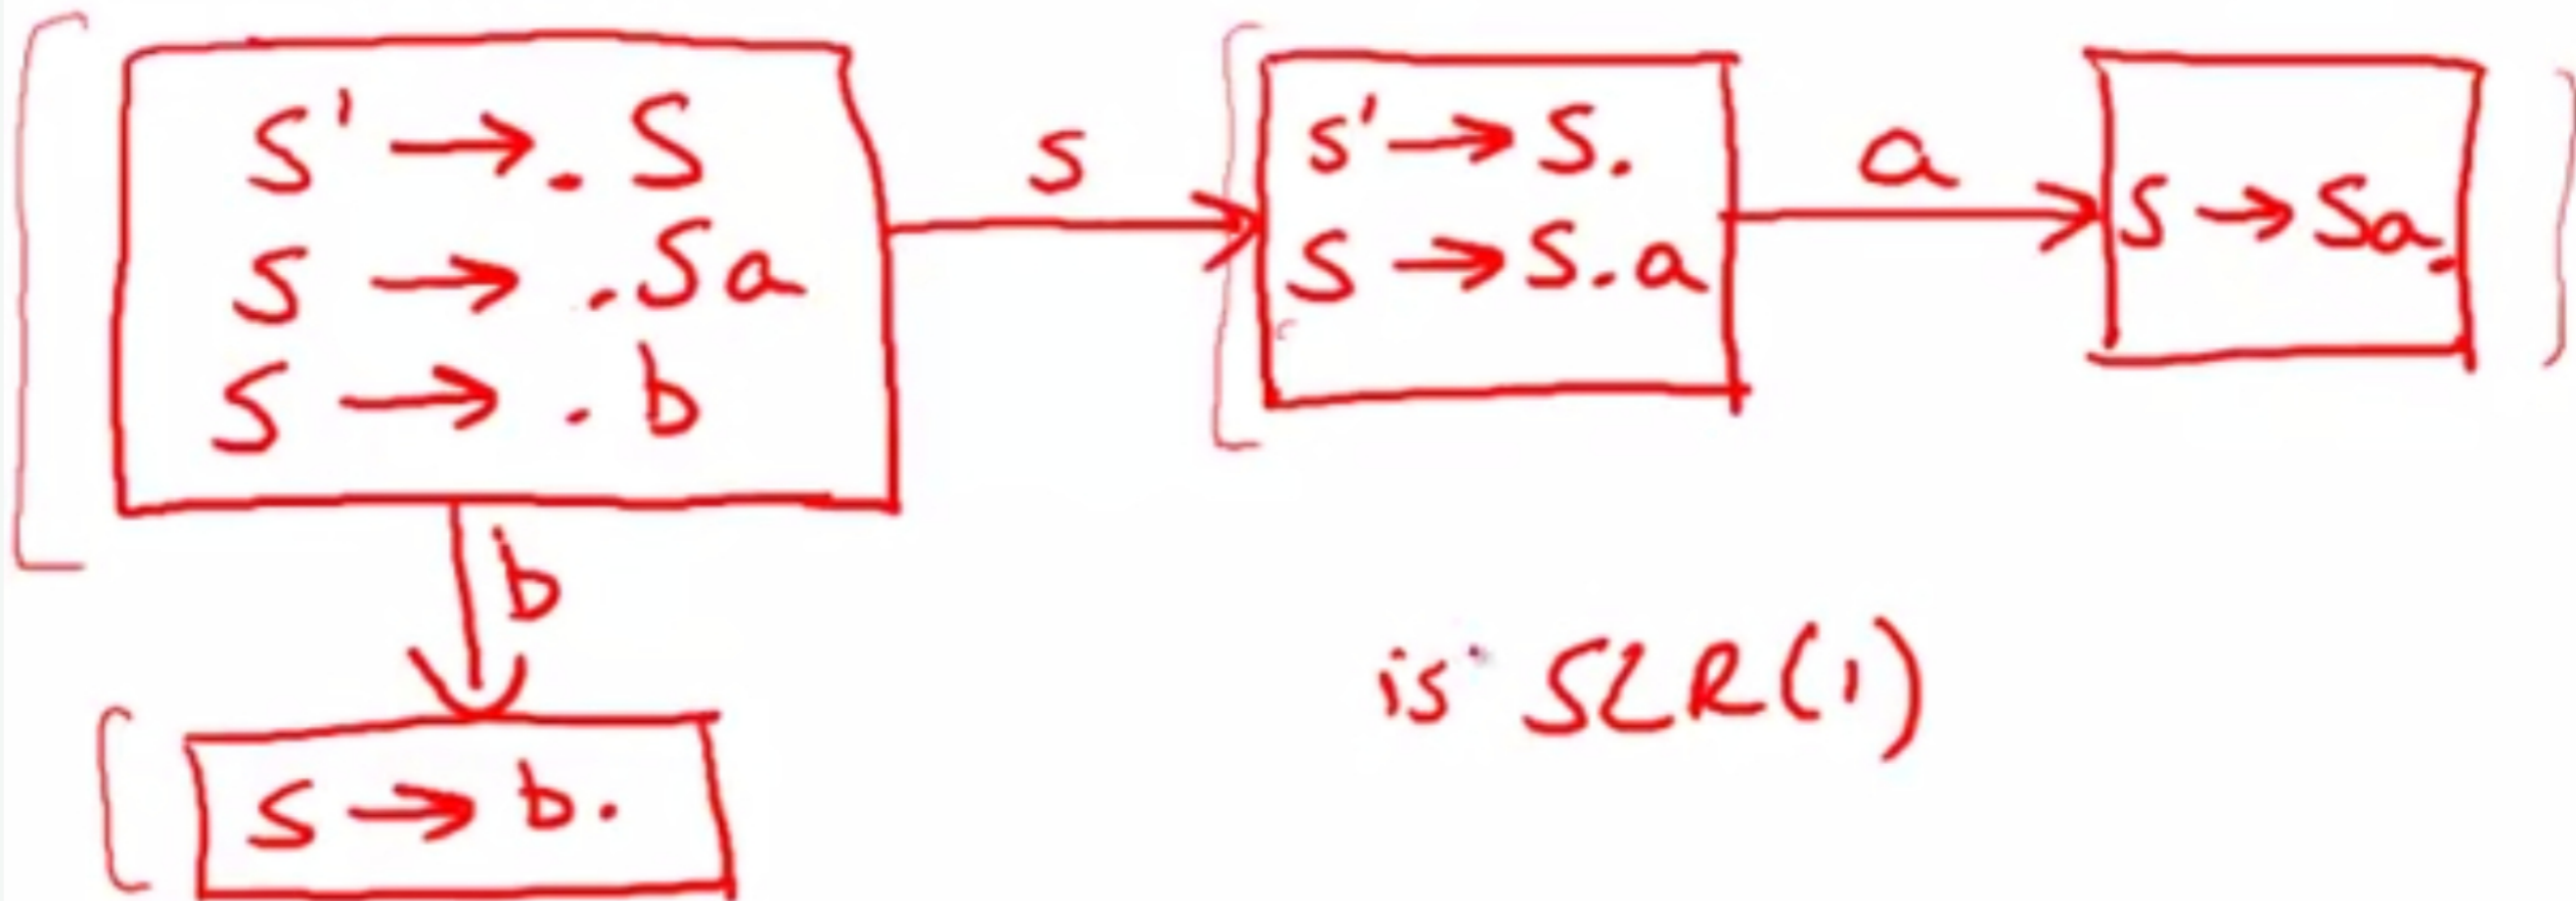

2. $S \rightarrow 0S1S \mid 1S0S \mid \varepsilon$

Q1. Are the following grammars SLR(1) w/o ambiguity

- Grammar1: $S \rightarrow Sa|b$
- Grammar2: $S \rightarrow SaS | b$

$S' \rightarrow S$
 $S \rightarrow Sa$
 $S \rightarrow b$

$follow(S') = \{ \$ \}$

$S' \rightarrow S$
 $S \rightarrow SaS$
 $S \rightarrow b$
